

A close-up photograph of several vibrant green leaves, with one leaf in the foreground being particularly sharp and detailed, showing its vein structure. The background is a soft-focus green.

technology is opportunity.

**Company Profile**

# Summary

Vegan Solutions

Expertise

Vegan in Action

The bottom of the slide features a dark, textured background with a pattern of water droplets and a curved, metallic-looking element on the left. The logo for 'vegan solutions' is positioned on the right side of this section. The word 'vegan' is in a large, bold, white sans-serif font, and 'solutions' is in a smaller, white sans-serif font below it.

solutions

# Vegan Solutions

We help companies **innovate**

**Technology** offers many choices and opportunities to ride the wave of the Third Millennium

Our deliverables is **high-tech software** and **solutions**

Technology is our passion, our lifestyle, our form of art

The bottom of the slide features a dark, textured background with a pattern of water droplets and curved lines. The company logo, "vegan solutions", is displayed in the bottom right corner. "vegan" is in a large, bold, white sans-serif font, and "solutions" is in a smaller, white, spaced-out sans-serif font below it.

solutions

technology is opportunity.

**Expertise**

# Expertise from the last decade

debian

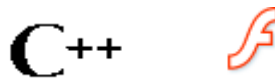

slackware  
linux

symbian

python

XML

QuickTime

Apache

# vegan solutions

# Environments

debian

slackware  
linux

symbian

We master the most important platform of the IT,  
from a lot of different flavors of **Linux**,  
to the **embedded** OS, Linux based, Symbian, Windows  
mobile, for mobile solutions  
to the high end server solutions by **Sun** and clean old  
style **Unix**

vegan  
solutions

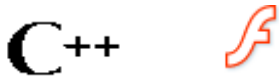

# Languages

**Java** with it's application frame (J2EE, J3d, etc) and web services solutions (JSP, Tomcat, etc) provide a complete framework for most solutions

**PHP** is an amazing web language

Python and Perl are for system administration and particular use

**C++** is to be used when the game gets tough

**.Net** provides a powerful framework for windows application with impressive IDE

Macromedia **Flash** unleash all multimedia to the web

# Database and servers

**MSSQL Server, MYSQL, ORACLE** are the best solutions for relational data base.

XML or even clean **ASCII** can help most cases.

**Oracle** is itself a full powerful technology, that has a Database, a presentation engine (Oracle form) that is very similar to Tomcat.

**Apache**, the world famous Web server, runs most of the internet (nearly 70%).

QuickTime

With real or quicktime server we can insert streaming content on web application.

## Realm of application

These technology can be applied to mobile world (mobile phones and PDA), to the desktop environment, to server with web services for world critical application.

... but the most these technology can be applied to things not so many realize as a field of action.

These are just embedded application with usb drive.

# We choose the best solution for each problem

- ❑ **Requirements, Analysis and Design Tools**
  - ❑ UML, Gentleware
- ❑ **Development Tools**
  - ❑ Netbeans, Emacs, Eclipse, MSVStudio,QT
- ❑ **Web Servers**
  - ❑ Apache, IIS
- ❑ **Application Servers**
  - ❑ Oracle, Jakarta Tomcat, Jboss, BV 7.0
- ❑ **Databases**
  - ❑ MYSQL, Oracle , MSSQL Server, Postgres
- ❑ **Graphics and Vectorial**
  - ❑ Flash Mx, 3dMax e Maya
- ❑ **Digital imaging and Data Representation**
  - ❑ Jpgraph ; Persistence of Vision
- ❑ **Operating System and platform**
  - ❑ Most Linux, embedded, Unix, Windows Ppc, Symbian
- ❑ **Distributed Framework Tools**
  - ❑ J2EE Containers, JMS, Oracle Suite
- ❑ **EAI Tools**
  - ❑ WebMethod
- ❑ **Languages:**
  - ❑ Java, XML, PL-SSQL,PHP, Perl,.Net, PL SQL
- ❑ **Source Control**
  - ❑ CVS, SourceJammer
- ❑ **Project Management**
  - ❑ VASoftware, Sourceforge, MSProject
- ❑ **Security & Control**
  - ❑ Snort IDS, Watchguard Firewall, Nagios monitor control, VPASM
- ❑ **Streaming Multimedia**
  - ❑ Realnetwork, Quicktime, Flash MX

# Open Source

**Open source** is a great opportunity to reduce time, reduce cost and the most to have the best implementation with the best standard and support

We are in contact with **top players** of the Open source world, (Mysql, Linux International, Knoppix)

... even with the great Finnish guy, **Linus Torvalds**, the creator of the Linux operating system.

**From:** [Linus Torvalds <torvalds@osdl.org>](mailto:torvalds@osdl.org)

**Date:** 4/12/2004 10:34 PM

**To:** [Enrico Neri <enrico.neri@select.it>](mailto:enrico.neri@select.it)

Anthony Curtis, MYSQL AB, 2004

Jon Maddog Hall, Linux International, 2003

technology is opportunity.

**Vegan in Action**

## :: Stand alone Cad

**Contest:** Multinational wrought iron leader Ind.i.a. S.p.A. required a 3d cad application to be distributed all over the channels to design wrought iron gates, windows, stairs, up to 10.000 installation. Timeline was very short and a particular requirement got us little mad: "do it from scratch" - meaning we could not apply any proprietary component. **Objective: sell more iron**

**Findings:** Vegan managed the timeline and the software development, with best of breed technology.

**Technology:** Java, J3d, Web Services, PHP, NuSOAP

**Platform:** Independent (both Linux and Windows)

**Note:** ACAD is protected by hardware key and licence engine, has a live update system to download updates and shell be integrated and interactive help desk

**Status:** stable (1000 copies)

## :: Bluetooth Handshake

**Contest:** A customer of ours, a company that provides a portal and other IT solutions for teenagers, required a viral marketing solution for sharing images, little movies and ringtones for a commercial campaign.

**Findings:** Vegan has realized an application that allows user to receive files via bluetooth connection, showing the preview before the sending is allowed

**Technology:** .Net for PPC client, C for Symbian, on standard bluetooth protocol

**Platform:** Mobile (PPC, Nokia and other Symbian)

**Note:** software for itself is very easy and there are several commercial software, but Idea Manager wanted it with particular features that shall unleash the potential of IM when the interactive Chat of web portal shall go live

**Status:** pre production( Beta)

## :: VeganLinux codename:: Wisdom

**Contest:** Vegan

**Findings:** Vegan is realizing wisdomlinux, a distribution for elderly people, with a website for community, a voip telephone system, chat, forum, with flash or USB drive, and particular and cheap computer

**Technology:** Desklet, Java, C for Kernel, Java for application

**Platform:** Linux (self compiled and distributed )

**Note:** this is both software to be distributed, community web service, and hardware (diskless computer)

**Status:** ongoing development (Alpha)

# Why Vegan

what is VEGAN? A vegan (pronounced VEE-gun) is someone who, for various reasons, chooses to avoid using or consuming animal products. While vegetarians choose not to use flesh foods, vegans also avoid dairy and eggs, as well as fur, leather, wool, down, and cosmetics or chemical products tested on animals.

why VEGAN? Veganism, the natural extension of vegetarianism, is an integral component of a cruelty-free lifestyle. Living vegan provides numerous benefits to animals' lives, to the environment, and to our own health—through a healthy diet and lifestyle.

“veganism, the natural extension of vegetarianism, is an integral component of a cruelty-free lifestyle”
